

2012 ANNUAL HENRICO 4-H BERRY PLANT FUNDRAISER

Sponsored by the Henrico 4-H Youth Program

Our goal is to provide quality products at reasonable prices. Proceeds from the sale will be used to support local 4-H youth programs. Call (804) 501-5160 for information. Orders should be sent to:

Henrico Extension Office, P.O. Box 90775, Henrico, VA 23273-0775.

STRAWBERRY PLANTS – All varieties are vigorous, free of pests, and freeze well. A bundle of 25 plants is enough for a forty-foot row. Strawberry season runs from mid-May to mid-June.

BLACKBERRY PLANTS – Plants are thorn-less; semi-erect; and bear very heavy, large fruit with excellent flavor. Blackberries ripen in mid-June and bear for three (3) weeks or more.

RASPBERRY PLANTS – Plants are hardy, ever-bearing, and produce red fruit which are very good for fresh consumption or for freezing. Always popular, this variety bears fruit in its first year, producing a light crop in spring and then a heavy crop in fall.

BLUEBERRY PLANTS – These are rabbit-eye varieties, two or more plants of different varieties planted no more than 100 feet apart are needed to insure good pollination. Plants are two years old, bare-rooted, 10" to 16" tall, and can produce 25 quarts of fruit when mature. Rabbit-eye season runs from late June until August.

Plants will be distributed (with instructions for planting and care) from Noon until 6:00 P.M. on Wednesday, March 21st and from 11:00 A.M. until 2:00 P.M. on Thursday, March 22nd at the Virginia Randolph Recreation Center (gray building) on the corner of Mountain Road and Jessie Chavis Drive (directly across from Virginia Randolph School). Availability is limited. Orders will be filled in the order received. **Orders must be received in the office by Friday, March 2, 2012. ORDER TODAY!**

Planting Site: All listed plants grow best in full sun in well-drained soil. They need a minimum of 6 hours of direct sunlight daily during the growing season. Strawberries, blackberries, and raspberries grow best when the soil pH is 6.0 to 6.5 and blueberries grow best in a soil pH of 5 to 5.5.

Strawberries - Little space is required. You'll love them all!

<u>Variety</u>	<u>Maturity</u>	<u>Berry size</u>	<u>Desirable features</u>
Earliglow	Early	Medium to Large	Productivity, flavor
Allstar	Mid-season to Late	Very Large	Quality, shelf life

Blueberries - Can serve as ornamentals, either free standing or as a hedge. They require little work.

*****Two or more plants of different varieties planted no more than 100 feet apart are needed to insure good pollination.*****

<u>Variety</u>	<u>Maturity</u>	<u>Berry size</u>	<u>Desirable features</u>
Climax	Early	Sweet, Medium	Excellent quality
Premier	Early	Sweet, Medium	Highly productive
Tifblue	Early to Mid-season	Quality, Medium	Fall color
Centurion	Mid-season to Late	Dark, Large	Easy management
