

**Vaccines are important.** They not only prevent disease in those who get the vaccine, they also help protect against unvaccinated people. **Vaccines save lives and money.**

In the United States, vaccinations and modern medicine have wiped out or contained many serious infectious diseases, such as polio, measles, mumps, rubella, diphtheria, whooping cough, and tetanus.

Coventry Health Care's Vaccine Program covers the drugs listed below. Some vaccines may require a doctor's prescription. Call your Medco® participating pharmacy for requirements and to make sure a certified immunizing pharmacist is on duty and your vaccine is in stock. Your claim will be submitted under the pharmacy benefit for covered vaccines. Visit [www.southernhealth.com](http://www.southernhealth.com) for a list of participating pharmacies.

**\$0 copay at Medco pharmacies that participate in the Coventry Health Care Vaccine Program.**

- **Hepatitis A** - Havrix, Vaqta
