

Henrico County Department of Public Utilities Solid Waste Division

Acceptable Refuse Containers in Our Automated Routes

The equipment we will use to collect trash in automated routes requires that only certain type containers are acceptable. Acceptable trash cans (representation above) will be approximately 95-gallons in capacity, constructed of heavy duty plastic with wheels and a lifting bar in the front of the can. This will allow the automated arm to grab the can without damaging the can or our equipment. If you have any further questions, please contact us at 804-727-8770.
